

Excelerate V2 Programme

What Leila's parents would like to share...

We chose to do the Excelerate V2 program because.....

The program has an early intervention approach to special needs education. It's holistic approach to Leila's learning difficulties and intensive therapy we hoped would give her that extra boost to kick-start her speech, OT and basic skills.

What we like most about the Excelerate V2 program is.....

The results for Leila have been exceptional . We continue to see improvements in all aspects of her basics skills. We also like the consistency that the team has shown her and us and the sharing of ideas and thoughts on improving Leila's behaviour at home.

We find the Excelerate V2 program unique in the following ways.....

The fact it takes children of such young age and now helps them follow through potentially to the age of 11 . Once the team has an understanding of the best approach for Leila the rapid improvement in her learning was astonishing. There are not many therapy centres or schools like this one . It's ability to tailor make the program around each individual child's needs is what sets it apart. It's like have a private one to one all in one super- therapist.

What we would tell our friends about the Excelerate V2 program....

If they suspect their child has special needs to immediately get them assessed at Excelerate. I would recommend the centre to anyone and tell them it has helped give us hope for Leila and our family. I believe if you want to give your special needs child a chance for a better life, including your family then I would recommend sending them to Excelerate V2 program.

Personal comments....

Sandra and I would like to thank all the team for the incredible work they have done with Leila . We arrived in despair and with scepticism . After 6 months and the belief and correct diagnosis for Leila by Pika, Joanne and the team they set about helping her. The results are astonishing. Before where the were no words, we have sentences. Before when Leila could not take off her shoes, now she can dress herself, go to the toilet and feed herself. Before she could not sit down for 10 seconds now she can be an example to her classmates of being an obedient and engaged student. We understand her and she understands us . We have all come a long way and our lives are much better for it. I am not sure what we would have done without this program . We would like to express our deepest gratitude and admiration for your hard work . We know it's not easy and you do exceptional work with these special children. We hope the school is a continued success for many more years to come. You have our highest regards and we will always be grateful for what you have done for all of us, especially Leila.

Keep up your excellent work !!!!

Best Regards

Maz & Sandra Majed
